

Blixtljus Röd / Blå / Grön / Gul LED TD-SL35

12/24V Flashing LED Strobe Light Emergency Signal Warning Light Alarm Siren

Product Description:

It's an automatic fire alarm system output devices, mainly work with conventional fire alarm control panel, in the event of a fire can be an effective warning sound and flash to notify people to evacuate. Use ABS engineering materials, surface hardening, durable, long life time. Built-in dual output audio amplifiers, loudly, high definition. Single power supply, high exchange of power usage. Applicable Scope: Burglar alarm for Bank, Shops, Villa etc. With adjustable holder, Convenient for installation.

Feature:

1. Automatically strobe when power is on, the red is connected to the positive pole, and the black is connected to the negative pole.
2. It is suitable for security guard booths, gates, road tunnels, airports, construction sites, etc. as warning lights.
3. Use ABS flame retardant material, high temperature resistance, corrosion resistance, and not easy to deform.
4. LED large strobe light. In rain, fog and snow, bright yellow lights can be easily seen, which is an effective warning.
5. This LED beacon light is made of high quality materials and has good performance.

The frequency of flashing is about 90 times/min.

Technical Specification:

Operating voltage: DC12V / 24V

Working current: $\leq 80\text{mA}$

Working temperature: $-10 \sim 50\text{ }^{\circ}\text{C}$

Flash frequency: 90 times / minute

Luminescent material: LED

Product weight: 130g

Dimensions: 100*77mm

Installation: screw

Color: red/yellow/green/blue

Installation Guides:

This Strobe light Can work with the alarm panel which with alarm sound output. Also connect the 12VDC battery for work stand alone, Install the 2 screws for fixed the strobe light.

Connection: Red line connect the positive pole (+).

Black line connect the Negative pole (-).

Product Details:

Multicolor optional, Red and Amber are normal colors.
