55000-TOUCH ZINC ALLOY

Touch Exit Button Standard - Metal

Touch-activated exit button for alarm, door control and access control systems

TECHNICAL DATA

Supply voltage	12-24 V DC
Relay output	Potential-free C / NC / NO
Relay rating	Max 36 V / 3 A
Service life	Up to 500,000 activations
Ingress protection	IP65
Material	Zinc alloy
Dimensions	86 x 50 x 16 mm
Certification	CE and RoHS

Robust touch button for professional door control

Activated by touch without mechanical pressure. When the relay is activated, the indicator turns green and automatically returns to the unlit state.

FEATURES

- Touch activation with no mechanical push button
- Green LED indication when the relay is activated
- Epoxy-filled internal components for moisture protection
- Suitable for alarms, door control and access control systems

INSTALLATION & SECURITY

- The base plate is released with one screw for quick installation
- No programming or special tools required
- Touch operation makes manipulation with an object through a door or gate more difficult
- Correct earthing is recommended for effective transient protection

NOTE Transient protection is most effective when the installation is correctly earthed.
